

Case Study

Application Entry

Background

ReliSource worked with a renowned Equipment Leasing company to enhance their legacy system that involves accepting and reviewing loan applications, based on Salesforce.com platform.

Solutions that added Value

-  Implemented world class UX design to give the user the best possible look & feel while using the application.
-  Auto populating data enabling Third Party Service call or using data form own system.
-  Optimized workflow by removing redundancies.
-  Turnaround time to complete an Application reduced from 25+ minutes to less than 5 minutes.
-  Page loading time reduced by 75%.
-  Added Data validation rules so user can't submit incorrect and incomplete data.
